**PROFILE**

I am a full stack developer I am deeply passionate about web development and constantly seek out opportunities to expand my knowledge and skillset.I believe that web development has the power to transform businesses and society, and I am committed to using my skills to create positive change.I am always excited to learn about the latest trends and technologies in web development, and I make it a priority to stay up-to-date on best practices in the field.For me, web development is more than just a job – it's a creative outlet that allows me to bring my ideas to life and make a difference in the world

**EXPERIENCE**

1. TECHNOLOGY

**FRONT-END DEVELOPER**

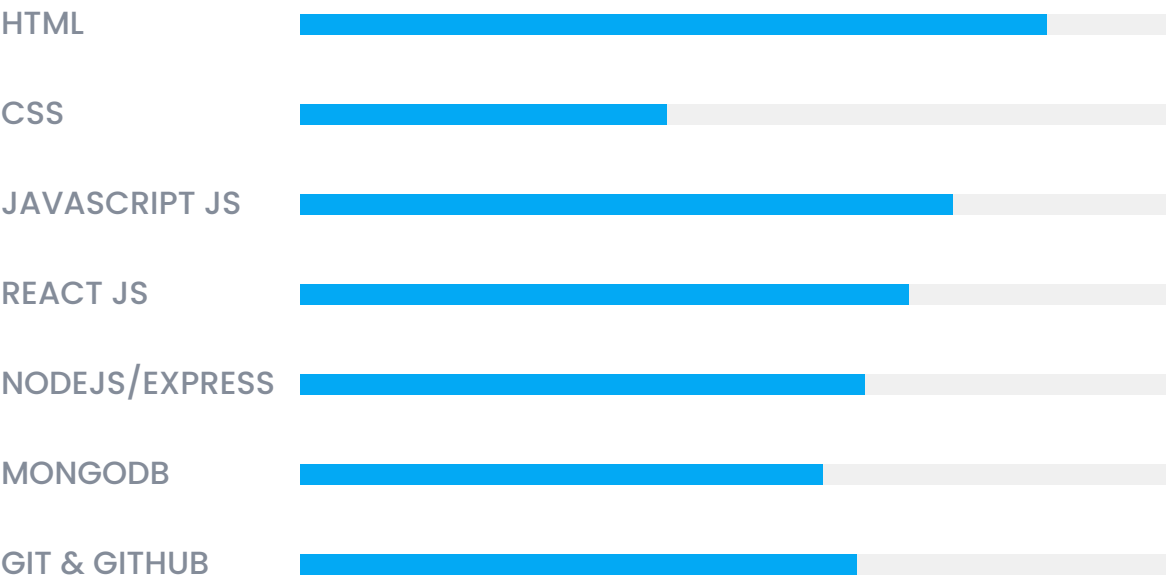

As a beginner in frontend technology, I am excited to bring my creativity and enthusiasm to your project. With a solid understanding of HTML, CSS, JavaScript and React I am ready to work with you to create a website that is both visually appealing and user-friendly. I am committed to staying up-to-date with the latest web development trends and best practices to ensure that your website is not only aesthetically pleasing, but also performs optimally. Let's work together to bring your website to life and make a lasting impression on your audience.

2. TECHNOLOGY

**BACK-END DEVELOPER**

As a beginner in Node.js, Express.js, and MongoDB, I am excited to bring my skills in these technologies to your project. With Node.js, I can create highly performant and scalable applications that can handle heavy loads. With Express.js, I can build APIs and web servers that are flexible and easy to maintain. And with MongoDB, I can create highly reliable and scalable databases that can handle large amounts of data. Together, these technologies provide a powerful and versatile stack that can handle a wide range of web applications. Whether you're building a new application or enhancing an existing one, I am committed to working with you to create a solution that meets your needs. Let's leverage the power of Node.js, Express.js, and MongoDB to create a web application that is fast, reliable, and highly scalable!
